

Hi there folks... I know you all are busy.. so will try to be breif.

Saw in the new paper that one of your senior officials said that the only people that contact him concerning broadcast ownership are lobbists. Kinda figured that was a sign I should get on the horn and call you all about it.. I did a nice lady asked me to file my comments here. Ok please don't let any more corporations the ability to concentrate ownership of tv and radio stations much less internet service providers. As it delutes entry level stations and removes ownership from the communities that are served. I was so dissapointed when AOL was allowed to buy Time Warner in my self for not expressing to you how disturbing that news was and this Federal Agency for allowing it to happen.. It is the reason for my responce to you folks. I also read a story bout a train derailment near Minot North Dakota where local law enforcement were unable to reach any local media .. there wasnt any. Was owned by clear radio.. i really want clear radio broke up.. in my mind it's a monopoly, and stifles competition. Hopefully someone will consider these things, and move in that direction as all I can do is comment to you and hope that my reasoning is sound and worthy of concideration. ok later you all thanks for your time and have a pleaseant day.... M. R.
